

SAATVIK RAGHUVANSHI

B.Tech CSE Student | Full-Stack Developer | Cloud Engineering Aspirant

Jaipur, Rajasthan, India | +91 9301661150 | raghuvanshisaatvik@gmail.com | linkedin.com/in/saatvik-raghuvanshi | github.com/saatvikraghuvanshi-lab

SUMMARY

Computer Science undergraduate at Manipal University Jaipur with hands-on experience building deployed full-stack web applications, AI-assisted workflows, Supabase/PostgreSQL backends, and frontend-focused product interfaces. Comfortable working across React, Next.js, TypeScript, Tailwind CSS, authentication, database design, cloud deployment, and practical UI/UX through hackathons, ideathons, freelance work, and project-based learning.

TECHNICAL SKILLS

Languages: C, Python, TypeScript, JavaScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Radix UI, Redux, responsive UI/UX

Backend and Database: Node.js, PostgreSQL, Supabase, Convex, REST APIs, authentication, Row Level Security

AI, Cloud and Tools: Gemini API, Inngest, Firebase, Google Cloud, Vercel, Netlify, Git, GitHub, ngrok

Other Technical Skills: AutoCAD, drone building, line follower robots, GIS map integration, robotics fundamentals

EDUCATION

Manipal University Jaipur - B.Tech in Computer Science and Engineering | Expected 2029 | Current GPA: 7.0

- Completed first year while building practical projects across web development, APIs, databases, AI workflows, UI/UX, and cloud-related tools.

Army Public School - Class 10: 86% | Resonance - Class 12: 82%

- Built early technical exposure through robotics, drone building, line follower systems, and technical workshops.

PROJECTS

ShockProof - AI Smart Meter Tariff Guard | Live: <https://shockproof.vercel.app> | GitHub: github.com/saatvikraghuvanshi-lab/ShockProof

- Built an AI-powered electricity meter assistant for Indian households using Next.js, React, TypeScript, Tailwind CSS, Supabase

Auth/Database/Storage/Realtime, Gemini OCR, and Vercel.

- Implemented secure meter photo/video uploads, reading history, manual correction fallback, kWh extraction, month-end usage projection, tariff slab distance, estimated bill, bill-risk level, and Gemini-generated household advice.

S2C - AI Sketch-to-Design Learning Project | Live: <https://ai-saa-s-sketch-to-design.vercel.app> | GitHub:

github.com/saatvikraghuvanshi-lab/Ai-SaaS-Sketch-To-Design

- Built a full-stack AI SaaS-style design tool with Google auth, project dashboard, infinite canvas editor, Redux canvas state, Convex database/auth/storage,

Inngest autosave, Gemini API routes, PNG exports, and JSON exports.

VibeBatch - Social Personality Web Application | Live: <https://www.vibebatch.net> | GitHub: github.com/saatvikraghuvanshi-lab/VibeBatch

- Architected Supabase/PostgreSQL data flows for user profiles, friend relationships, anonymous trait voting, messages, invite sharing, premium identity cards, Gemini help support, and Row Level Security-based privacy.

ResilienceOS - Disaster Management Web Platform | Live: <https://resilienceos.vercel.app> | GitHub:

github.com/saatvikraghuvanshi-lab/RESILIENCEOS

- Built role-based disaster-response workflows for admin command, responder tasks, civilian SOS reporting, map simulation, readiness training, strategic forecasting, and report generation; recognized as a 4th place Startup Forge Ideathon project.

JanSahayak - AI Public Assistance Web Application | Live: <https://jansahayak1.netlify.app>

- Developed a civic-tech prototype for a college Vibeathon covering login, scheme discovery, filters, user dashboard, and AI assistant flow; placed in the top 5.

EXPERIENCE

Freelance Full-Stack Developer - VibeBatch

- Delivered a live freelance web product with frontend implementation, Supabase-backed workflows, authentication, database design, deployment readiness, and product UI refinement.

Cloud Computing Training - Training Phase

- Building foundational cloud computing knowledge aligned with cloud engineering internships, deployment workflows, backend services, and infrastructure fundamentals.

ACHIEVEMENTS AND CERTIFICATIONS

- INDIA.RUNS 2026 Ideathon: Built ShockProof for Challenge 3, Improve Everyday Life with AI, as part of team Noble Dawn.

- Startup Forge Ideathon: 4th Place Finisher, GCEC Global Foundation, for ResilienceOS during a 48-hour build.

- Technical workshops and hackathons: Rewind & Recode National Hackathon, Robotics Workshop at Techfest IIT Bombay, WRC Quadcopter Challenge, Fastest Line Follower Challenge, Machine Learning Workshop, and AI/Prompt Engineering career session.
